

Get paid to review specialised agents.

Test agents on tasks you know from your field. Record the results and tell the agent builder what should change.

Earn \$200 for the agreed review.

\$200

USD for one review and one follow-up

The fee covers the review, agreed use of your method and one follow-up. Quote a different fee if the work needs it.

01

Show your experience.

IXO checks your identity, relevant experience and credentials the review requires.

02

Agree the work.

Confirm the agent version, scenarios, fee, permitted use and payment terms.

03

Test and report.

Record the interactions and recommend changes. Earn the agreed fee even when you find problems.

Ownership and permitted use

You retain ownership of your method. Agree how the agent builder may use case feedback to improve the reviewed agent. Wider reuse or AI training requires separate written permission.

IXO agrees the tasks, acceptance criteria, payment milestones and any setup work with you before engagement. Each review must be within your competence. The \$200 pilot fee includes one follow-up. Quote the full fee the work requires. The pilot does not guarantee a number of reviews.

Apply to review agents in your field.

Describe your experience, the tasks you can assess and your availability. Give a complete fee or ask to discuss the work before quoting.
